

The Regional Climate Adaptation Knowledge Platform for Asia

The Adaptation Platform is a three-year programme that supports training, research, information sharing and capacity building that will help countries in Asia adapt to the challenges of climate change. In 2009, the first year of operations, the Adaptation Platform is supporting activities in Bangladesh, Cambodia, Nepal, Thailand and Vietnam.

The platform is building bridges

Between Science and Policy

Between Government and Private Sector

Between Researchers and Communities

Between current knowledge on adaptation to climate change....and the governments and agencies that need it.

For more information about the Adaptation Platform, please contact:
